About Me

Frontend Software Engineer experienced in building web and mobile applications with React, TypeScript, and React Native. Actively developing independent projects, expanding technical skills, and teaching programming. Seeking opportunities to build practical, user-focused solutions within a development team.

Skills

- **Frontend:** React.js, React Native, TypeScript, JavaScript, React Router, Vue.js, HTML5, CSS3, Tailwind CSS, Sass
- **APIs & Data:** REST APIs, Axios, Firebase, MySQL
- **Tools:** Git, GitHub, Figma, Expo

Courses

- **AI Starter Piscine** 01 Founders – London
- **Data Analyst in Python** DataCamp (In progress)
- **Machine Learning** DeepLearning.AI (In Progress)
- **React Nanodegree** Udacity

Education

Bachelor of Engineering in Computer Engineering

Mansoura University, Egypt

Web Design & Development Diploma

ELATT, London — Dec 2024

Experience

Software Engineer ONGOING

Independent Projects

- Developing independent React and React Native projects using TypeScript, Firebase and REST APIs.
- Created user-focused applications with search, authentication and responsive interfaces.

React Engineer MAR 2023 – MAY 2024

Digitopia Studio

- Developed React features including a real-time Community Q&A, search functionality and interactive dashboards.
- Translated Figma designs into responsive, user-focused interfaces and improved frontend usability.

Coding Teacher For Kids

Mini Developer

MAY 2024 - NOW

- Teach HTML, CSS, JavaScript, Python and Scratch fundamentals to students aged 7–14.

Featured Project

Quran Revision & Scheduling Mobile App — React Native, Expo, TypeScript

- Built a React Native app to manage memorised Surahs and track revision progress.
- Implemented review prioritisation and automatic scheduling based on mastery levels.
